SUMIT PRAMANIK

React Native Developer / Mobile Architect | Senior React.js & React Native Engineer

Jaipur, Rajasthan, India | +91-9587130971 | sumit.pramanick@hotmail.com | linkedin.com/in/sumitaasur

PROFESSIONAL SUMMARY

React Native Developer and Mobile Architect with 8+ years of experience (6+ years building React Native and React.js applications) designing and delivering scalable iOS and Android apps for product-based companies. Strong in JavaScript (ES6+) and TypeScript, Redux and Redux Toolkit state management, REST API and third-party SDK integration, performance optimization, and end-to-end release management on the Apple App Store and Google Play. Owns architecture and solution design, code reviews and technical decisions while mentoring developers and partnering with stakeholders to turn ambiguous requirements into maintainable, production-grade systems. Shipped 17+ applications across fintech, healthcare, fitness, logistics, education, and e-commerce for clients in the US, Europe, UAE, Australia, and India.

CORE COMPETENCIES

- **Mobile:** React Native (Android & iOS), Cross-Platform Architecture, Mobile Solution Design, Native Module & Third-Party SDK Integration, Offline-First Design (local storage, sync, conflict handling)
- **Languages:** JavaScript (ES6+), TypeScript
- **State Management:** Redux, Redux Toolkit, Context API
- **Web:** React.js, Next.js, Responsive Design, Reusable Component Architecture
- **API & Services:** REST APIs, Axios, Firebase (Auth, Realtime Data, Push Notifications), Agora, Payment Gateways
- **Performance:** Lazy Loading, Code Splitting, Memoization, React DevTools Profiling, Production Troubleshooting
- **Security:** Authentication Flows (Firebase Auth), Secure Payment Integration, Secure Coding Practices
- **Build, Release & CI/CD:** Xcode, Android Studio, Jenkins, CI/CD Pipelines, Git, App Store & Google Play Release Management
- **Testing:** Jest, Functional / Regression / UAT Testing
- **Cloud:** AWS (CloudFront, S3, CloudWatch)
- **AI-Assisted Development:** Claude, GitHub Copilot, Cursor, ChatGPT, Codex
- **Leadership:** Architecture & Technical Decision-Making, Code Reviews, Mentoring, Stakeholder Management, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Konstant Infosolutions *May 2025 – Jul 2026*

- Owned architecture, solution design, and end-to-end delivery of scalable React Native and React applications for international clients, establishing patterns that kept performance and maintainability consistent across web and mobile codebases.
- Led REST API integrations for production releases, tightening code review and testing practices to catch defects before they reached end users.
- Served as the primary technical point of contact for cross-functional teams and stakeholders, translating client requirements into production-ready features and improving delivery predictability.

React / React Native Developer — Freelance *Oct 2024 – May 2025*

- Delivered custom, production-ready React Native and web applications for international clients as an independent contractor, owning the full lifecycle from requirements gathering through App Store / Google Play deployment.
- Acted as sole technical decision-maker, setting architecture, tooling choices, and delivery timelines directly with stakeholders.

React.js / React Native Programmer — Dotsquares Technologies *May 2023 – Oct 2024*

- Led development of cross-platform React Native applications, establishing reusable component patterns that improved build consistency across Android and iOS.
- Integrated Firebase (authentication, real-time data, push notifications) and third-party services, strengthening reliability for end users.
- Drove performance improvements through lazy loading, code-splitting, and memoization, meaningfully improving the experience on lower-end devices.

React Native Developer — Arka Softwares Pvt Ltd *Feb 2022 – Mar 2023*

- Built cross-platform mobile features in close collaboration with UX/UI designers, ensuring design fidelity and consistent usability across releases.
- Integrated third-party APIs, SDKs, and libraries including Firebase and Axios, streamlining data management and reducing integration overhead for the team.

React.js / React Native Developer — Dev Technosys Pvt Ltd *Nov 2019 – Feb 2022*

- Delivered responsive web and React Native mobile applications for global clients, contributing to consistent on-time delivery across concurrent projects.

- Provided production support: resolved issues and incorporated client feedback quickly, shortening turnaround time on fixes.
- Partnered with backend developers to integrate REST APIs, ensuring reliable data flow and reducing integration-related bugs.

Quality Analyst — Bill Gosling Outsourcing (formerly MattsenKumar Pvt. Ltd.) *May 2018 – Sep 2019*

- Created and executed test cases, scenarios, and test data; performed functional, regression, smoke, sanity, and UAT testing to identify defects and ensure requirements were met.

KEY PROJECTS

Metalete *(React Native, Three.js)*
Pre-launch 3D avatar customization app for a US sports organization. Integrated Three.js within React Native to render interactive, real-time 3D athlete avatars and built custom avatar and gear customization flows.

NASM EDGE *(React.js, React Native)*
Fitness management platform for personal trainers. Built trainer- and client-facing features across web and iOS/Android from a shared codebase, covering workout programming, client management, and progress tracking.

Medara Health *(React Native, React.js, Next.js)*
Pre-launch healthcare platform across four surfaces (patient mobile app, patient web app, doctor portal, lab portal). Developed appointment, consultation, and diagnostic-report workflows connecting patients, doctors, and labs.

Bonify *(React Native, React.js, Next.js)*
German fintech platform offering free SCHUFA credit scores. Built web and mobile experiences sharing logic across platforms, delivering personalized financial insights and credit-optimization recommendations.

Glimpse It *(React Native)*
Australian mobile app for discovering and buying low-tox household products. Built the app end-to-end, covering product discovery, browsing, and purchase flows.

Clinical Trial Link *(React Native, Next.js)*
Platform for managing clinical trial participation. Built patient registration flows in React Native and a Next.js portal for hospitals and clinics, simplifying recruitment and coordination.

Luqman *(React Native, Firebase, Agora)*
Arabic education app with real-time calling. Integrated the Agora calling SDK for reliable voice connectivity, used Firebase for backend data, and built a post-call rating system.

Blue Sky Peptides *(React.js, Next.js, Redux)*
US pharmacy e-commerce platform. Implemented Redux-based cart and checkout and integrated payment gateways for secure, self-serve ordering of regulated products.

MetaMerch *(React.js, Next.js, Three.js)*
UK 3D product customization platform. Integrated Three.js for real-time 3D rendering and built interactive controls for personalizing merchandise before purchase.

ADDITIONAL PROJECTS

- Dehurdle (React Native) — Meditation app with mood-based music and guided meditation recommendations.
- Coffee Hub (React Native) — UAE coffee and bakery ordering app covering menu, cart, and order placement.
- CarpetRight UK (React.js, Yext) — Store locator and directory management for a UK retailer.
- 86 Agency (React.js, Next.js, Three.js) — Marketing website with interactive Three.js visuals.
- StudyGoGo (React.js, Next.js) — Education platform centralizing quizzes, homework, and assignments for a Vietnamese institute.
- NAS Freight Solutions Ltd. (React.js) — Kenyan logistics platform to post, assign, and track orders in real time.
- Ozeki Sake (React.js) — Product comparison website for a Japanese-American brewery.

ACHIEVEMENTS

- Improved frontend performance by up to 35% through code-splitting, lazy loading, and component-level optimization.
- Delivered 17+ production-grade web and mobile applications used across the US, Europe, UAE, Australia, and India.
- Reduced development turnaround time by approximately 30% by designing reusable component libraries and frontend standards.
- Launched and maintained multiple applications on the Apple App Store and Google Play Store.
- Mentored junior and mid-level developers, improving code quality and onboarding efficiency.

EDUCATION

Bachelor of Computer Applications (B.C.A.) — Rajasthan University, Jaipur *2012 – 2016*
